We Are EA

And we make games - How cool is that? In fact, we entertain millions of people across the globe with the most amazing and immersive interactive software in the industry. But making games is hard work. That's why we employ the most creative and passionate people in the industry.

<u>**Save the planet from Alien Invaders. Score the winning touchdown.**</u>
<u>**It's the coolest job on the planet!**</u>

The Challenge Ahead:

EA's Digital Platform Gameplay Services team has a need for a Server Engineer in EAC, Burnaby. Our platform powers online features for EA's game titles serving millions of users each day.   The candidate has an opportunity to build server-side systems that deliver new functionality to the platform, as well as work on regular improvements to the systems to keep them at top notch performance.

Responsibilities:

- Work with product managers to innovate on new features to support EA's business
- Be a part of the overall software design and architecture process of our systems
- Continually strive to optimize performance and scalability of server systems
- Provide maintenance and support for new and existing services
- Be a champion for best practices within the engineering team

Basic Qualifications:

- Technical mentoring experience
- 4+ years hands-on Java/J2EE experience
- Expertise with relational and/or NoSQL database
- Experience working on high traffic services and highly scalable systems
- Principle experience with all phases of product development lifecycle, including requirement definition, development, test, and product release
- Exceptional analytical and creative problem solving skills, solution oriented individual
- Excellent written and verbal communication skill

Preferred Qualifications:

- Strong expertise working on RESTful web services
- Use of technologies such as memcached and NoSQL in production systems
- Experience working within the games industries
- Experience working with XMPP services

What's In It For YOU? Glad You Asked!

We love to brag about our great perks like comprehensive health and benefit packages, tuition reimbursement, 401k with company match and, of course, free video games. And since we realize it takes world-class people to make world-class games, we offer competitive compensation packages and a culture that thrives off of creativity and individuality. At EA, we live the "work hard/play hard" credo every day.
