We are EA
And we make games – how cool is that? In fact, we entertain millions of people across the globe with the most amazing and immersive interactive software in the industry. But making games is hard work. That's why we employ the most creative, passionate people in the industry.
<u>**Save the planet from alien invaders. Score the winning touchdown.**</u>
<u>**Yup - it's the coolest job on the planet!**</u>

Associate Technical Director

<u>The Challenge Ahead</u>:
The EA Central Development Services group is a critical partner of EA game development teams and a driver for quality and productivity within those teams. Come and join us for an opportunity to work with the best game development teams in the world in a challenging yet fun and creative environment. Innovate to keep EA at the bleeding edge of the industry standards for quality and processes to make a difference for thousands of employees and millions of gamers in the world.

<u>What an Associate Technical Director does at EA</u>:
We are looking for a Associate Technical Director with a focus on Quality Engineering supporting the Tiburon team to champion change, innovation and quality. You will drive the strategy and planning function and deliver tools, methods and processes that meet our studio needs. Additionally, you will capture the use and distribution of Quality Tools across all labels and provide support and leadership in the area of integrating, testing and releasing the tools and infrastructures for the group.

To be successful, you must:
    a. Lead the development of tools and technology commitments
    b. Drive & recognize innovation and manage opportunities
    c. Be a value multiplier for technical proficiency across the OneQA team
    d. Assist integrated owners to understand the technology requirements of their domain, help plan for service, strategies, adoption & dependencies

Other areas of focus include "Implementation and Deployment". You will conduct code reviews, and establish a robust quality assurance process, and provide consulting to game teams and central technology providers on strategies at the component, sub-system, system level and services.

Operational management responsibilities include ensuring technical problems are resolved in a timely and cost-effective manner, and that internal technological processes and customer-facing services comply with expectations. You will promote achievement of the tools team business goals and develop policies for sharing software code. In short, your job will be to help create a strong and coherent technical community by developing excellent relationships with technical peers in game development teams across EA studios.

<u>The next great EA Associate Technical Director also needs</u>:
• Bachelor's degree or higher in Computer Science, Engineering or Software Engineering or equivalent

• A minimum of 6 years software industry technical experience working on tools, test automation and/or development process improvements.
• Excellent organizational communication and management skills with a strong desire to contribute to a unique creative environment by utilizing world-wide talent.
• Project management skills demonstrated by the ability to define tasks in a well-organized manner, based on proper resource and time management.
• Training and presentation skills
• Knowledge of performance and code optimizations techniques
• Experience using configuration management and software management suites and tools

What's in it for you? Glad you asked!
We love to brag about our great perks like comprehensive health and benefit packages, tuition reimbursement, 401k program with company match and, of course, free video games. And since we realize it takes world-class people to make world-class games, we offer competitive compensation packages and a culture that thrives off of creativity and individuality. At EA, we live the "work hard/play hard" credo every day.
